Kubernetes, Ansible, Terraform,
AWS
Verilog, MIPS Assembly Code
Project collaboration, Agile
Practices
Adobe CC, Microsoft Office,
SolidWorks, Pro Tools, Google
Sketchup

ABOUT ME

A final-year software engineering student with a lifelong commitment to learning and development. Striving to create positive change through software.

WORK EXPERIENCE

Software Developer

2025 - Current

Leidos Australia

Software developer contributing to research and development initiatives, implementing code, and presenting project outcomes to technical and non-technical audiences. Researching and exploring new innovative ways to solve problems using software. These experiences and projects include DevOps (AWS, Kubernetes, Ansible, Terraform), machine learning, implementing LLMs and MCP tools, creating cyber security tools (Splunk), documentation etc.

Production Assistant

2021 - 2024

Sift Inc. (ATP Media)

Working at prestigious world tennis sporting events with ATP Media (Australian Open and United Cup in Sydney). Assisted the production of promotional and social media content, managing communication between camera operators and media manager on site. Assisting to create sport media content pieces, operation of second angle or b-shot cameras during shoots and interviewing high profile players such as Novak Djokovic during dynamic situations such as flash zone interviews. Collaborating with dynamic and ever-changing teams from different parts of the world to create excellent sports media in erratic environments.
